1. Highlights

1.1 Corporate profile

China Star Food Group Limited (中国之星食品集团有限公司) (“**CSFG**” or the “**Company**”), together with its subsidiaries (the “**Group**”), is one of the leading manufacturers of healthy snack foods in the People’s Republic of China (“**PRC**”). The Group is engaged in the production and sale of sweet potato snack food products across PRC, processed from purple and orange-fleshed sweet potatoes. Currently, the annual total production capacity of the Group is approximately 30,000 tonnes.

Based in Liancheng county of Fujian Province, the Group sells its wide range of sweet potato snack food products to more than 300 distributors and wholesalers, who in turn distribute the sweet potato snack food products, through e-commerce portals and to supermarkets, petrol kiosks, convenience stores and specialty stores throughout the PRC.

The Group’s six broad product categories include sweet potato pastries, candies, crisps, baked goods, roasted sweet potato nuts and preserved foods. The Group also has a series of proprietary product brands, such as “Starpie” (星派), “Ledi” (乐地), “Delijia” (德丽佳) and “Zilaohu” (紫老虎). “Zilaohu” and “Starpie” were recognised as a “Famous Trademark of Fujian Province” in 2013 and 2015 respectively.

Through its wholly-owned subsidiary, Fujian Zixin Biological Potato Co., Ltd. (福建紫心生物薯业有限公司) (“**Zixin**”), the Group operates three wholly-owned indirect subsidiaries Fujian Zilaohu Food Co., Ltd. (福建紫老虎食品有限公司) (“**Zilaohu**”), Liancheng Dizhongbao Modern Agriculture Development Co., Ltd. (连城县地中宝现代农业发展有限公司) (“**Dizhongbao**”), and Fujian Xingpai Food Co., Ltd. (福建星派食品有限公司) (“**Xingpai**”).

CSFG was listed on the Catalist board of Singapore Exchange via a reverse takeover of Brooke Asia Limited on 22 September 2015.

1.2 Message to stakeholders

On behalf of our Board of Directors, it is my pleasure to present our Sustainability Report for the financial year ended 31 March 2018 (“FY2018”).

FY2018 was a challenging period for the Group as it continued to face the effects of environmental control policies implemented by the Government of the PRC. This development substantially impacted the Group’s performance and operations during the year under review.

Despite these challenges, we were able to remain resilient and make significant strides in improving our operational efficiency and productivity. At the same time, we continued our efforts to fortify our position as one of the leading players in the sweet potato snack food industry as a result of industry consolidation.

With the resumption of operations in our Zilaohu factory in October 2017, the Group believes that it is now ready to embrace greater opportunities ahead. As many smaller competitors have ceased operations after failing to comply with the government’s strict regulations, the Group now faces lesser competition from the industry going forward. The recommencement of operations also enabled us to meet the demand for the coming peak sales season.

At the same time, we will also continue to improve on our existing sales channels while keeping an eye on expansion opportunities in the domestic PRC market and beyond.

In our inaugural sustainability report, we will be reporting on the Group’s sustainability efforts, comprising of Economic Contribution, Food Safety, Environmental Sustainability, and Social Contribution.

In addition, we wish to confirm that the Board has considered sustainability issues as part of its strategic formulation, determined the material environmental, social and governance (“ESG”) factors and overseen the management and monitoring of the material ESG factors.

As part of the Group’s commitment to sustainable development, we will continue to strive to do business in a responsible way.

On behalf of the Board of Directors

LIANG CHENGWANG

Executive Chairman and Chief Executive Officer

1.3 Scope of sustainability report

The scope of the report covers information on material sustainability aspects of CSFG and its subsidiaries, from 1 April 2017 to 31 March 2018 unless otherwise specified. This should sufficiently address stakeholders' concerns in relation to sustainability issues arising from the major business operations of the Group.

This report is prepared in accordance with the Global Reporting Initiative ("GRI") Standards: Core Option as it provides a set of an extensive framework that is widely accepted as a global standard for sustainability reporting. It also considers the Sustainability Reporting Guide in Practice Note 7F of the Singapore Exchange Securities Trading Limited ("SGX-ST") Listing Manual Section B: Rules of Catalyst ("Catalist Rules"). In preparing our report, we applied the GRI's principles for defining report content and report quality by considering the Group's activities, impacts and substantive expectations and interests of its stakeholders.

The data and information provided within the report have not been verified by an independent third party. We have relied on internal data monitoring and verification to ensure accuracy.

Sustainability contact

We welcome your views and feedback on our sustainability practices and reporting at sr@zixinshuye.com.

2. Our approach to sustainability

2.1 Sustainability organisational structure

Sustainability is a vital part of our corporate strategy for achieving long-term growth. The values we create for our people, the environment and society at large very much determine our financial performance. We developed a sustainability organisational structure to move things forward:

2.2 Sustainability strategy

At the Group, our sustainability strategy aims to create integrated values.

Together with disciplined execution of our strategy and a commitment to doing business responsibly, we commit to deliver value to all our stakeholders through the following:

The sustainable strategy is underpinned by our comprehensive and extensive internal policies that covers the areas above such as regulatory compliance, performance monitoring, occupational safety and health, employee training, waste reduction and employee welfare.

The strategy is also guided by external sources, including ISO 9001:2008 Quality Management, Hazard Analysis and Critical Control Point ("**HACCP**") System Certification, Global Reporting Initiative Standards and Sustainability Reporting Guide in Practice Note 7F of the Catalyst Rules.

2.3 Consulting our stakeholders

We recognise the need to continuously develop our responsible business approach in order to address growing stakeholder expectations around our impact on the economy, environment and society.

As such, we periodically consult with our stakeholders to determine the issues that are most relevant to them and the Group. An overview of our approach and rationale is set out below (with stakeholders listed in alphabetical order), together with the feedback we have received.

Stakeholders	How we listen	Why we do it	What you've told us
Customers	<ul style="list-style-type: none"> Focus groups with consumers Market survey on consumer tastes Customer service hotline Feedback from distributors Inspection of company production lines 	<ul style="list-style-type: none"> Consistently improve product taste and innovation through market survey and R&D Include customer service hotline and nutritional information on product packaging Obtain the necessary food safety certificates from relevant authorities 	<ul style="list-style-type: none"> Tasty and innovative snacks and products Meet quality and nutritional requirements Compliance with food safety and environmental laws and regulations
Employees	<ul style="list-style-type: none"> Employee feedback mailbox Wechat platform Employee caring session 	<ul style="list-style-type: none"> Compliance with regulations Provide healthy work environment to ensure the well being of all our staff 	<ul style="list-style-type: none"> Salary increment Problem solution Improve employee welfare and benefits
Government and regulators	<ul style="list-style-type: none"> Understand relevant laws and regulations Interaction with government and industrial bodies Trainings and meetings 	<ul style="list-style-type: none"> Compliance with laws and regulations Uphold highest standards of corporate governance and ethical behavior Participation in government-related events 	<ul style="list-style-type: none"> Compliance with food safety and environmental laws and regulations Compliance with SGX regulations
Investors/ shareholders	<ul style="list-style-type: none"> Shareholders' meeting Board meeting China Star website Regular updates and communication 	<ul style="list-style-type: none"> Consistently improve company's management Operate, manage and compliant against regulations Committed to delivering economic value to our capital providers through a strong financial performance and our methods of engagement with them 	<ul style="list-style-type: none"> Long-term profitability Achieve company targets Growing and development Compliance with laws and regulations
Suppliers/ business partners	<ul style="list-style-type: none"> Inspection of suppliers' production lines Interaction with supplier representatives Perform periodic supplier evaluation 	<ul style="list-style-type: none"> Build up strategic business relationship Compliance with food safety regulations 	<ul style="list-style-type: none"> Timely payment and adherence to agreement terms Compliance with food safety and environmental laws and regulations

2.4 Sustainability materiality

Using a materiality index, we align our responsible business priorities with the Group's principal business and operational risks, as illustrated in the diagram below.

We have also developed metrics to help us measure our progress, as indicated in our sustainability scorecard in **Appendix A**. We will review and adjust the material issues and relevant metrics each year, as the external and business context changes.

3. Our performance

3.1 How we measure our performance

Our **sustainability strategy** is embedded into the appropriate parts of our business, with dedicated teams for each focus area, and coordination by our relevant departmental managers.

Progress will be tracked in two key ways: measuring performance against metrics, and evaluating how well the programs have advanced, through a series of 'commitments'.

Metrics and targets

We have established key performance indicators for each of the four focus areas outlined in our **sustainability strategy**. As this is our first year adopting sustainability reporting, we will be establishing quantitative targets within the next year to hold ourselves accountable and track how we are doing.

Periodically, we plan to introduce new metrics and update targets to ensure alignment with our strategy.

Commitments

To ensure we have a robust sustainability program in place, we will also publish the key initiatives we plan to implement in the next sustainability report.

3.2 Economic contribution

Overview

The concepts of a healthy diet and quality lifestyle have become increasingly prevalent across the PRC. In tandem with rapid urbanisation and higher disposable income, this reflects a burgeoning demand for convenient and healthy food products.

As one of the leading players in the sweet potato snacks industry, the growing health-conscious trend provides a bounty of opportunities for the Group to capture a broad consumer base in the PRC and beyond. We offer a diverse range of nutritious products, which currently include sweet potato baked goods, candies, pastries, crisps, preserved foods, roasted sweet potato nuts, nougats and steamed sweet potato snacks.

In addition, we believe that effective management of our supply chain can help us conserve resources, optimise processes, increase productivity and promote positive corporate values. We are dedicated to the consistent implementation of our procurement policies and procedures across our entire operation.

Future trends

According to Euromonitor International estimates, sales volume of packaged food in mainland China reached approximately RMB1,577 billion in 2017, representing an average annual growth rate of 6.6% since 2012¹.

Meanwhile, the rise of e-commerce and online retail sales in China has presented businesses with an avenue to reach consumers in a fast and convenient manner. In a 2017 consumer survey conducted by HKTDC Research, consumers ordering packaged snacks through online shopping channels have risen exponentially².

In order to tap the growing potential of the e-commerce industry in China, the Group seeks to build upon our digital market presence, as well as enhancing our customer engagement online. We believe that these strategies will further drive customer reach and brand awareness.

Nevertheless, brick and mortar stores are still the most significant channel for purchasing packaged food products and we continue to build a solid foundation for widening our footprint in the hypermarket segment, while keeping an eye on expansion opportunities in the domestic PRC market and beyond.

² <http://economists-pick-research.hktdc.com/business-news/article/Research-Articles/China-s-Packaged-Food-Market-Major-Consumer-Trends/rp/en/1/1X000000/1X0ADC6u.htm>

Promoting a 'sweet potato' lifestyle

The Group seeks to build upon our digital market presence, as well as enhancing our customer engagement online, via our WeChat official account and our Taobao e-commerce website (starpay.world.tmall.com). Through these avenues, we seek to educate our customers on adopting a healthy, 'sweet potato' lifestyle in line with our Company vision.

Sweet potatoes offer a healthy and rich source of nutrients, is rich in complex carbohydrates, dietary fibre, beta carotene, vitamins A, B6 and C³.

Sweet potatoes are rich in beta-carotene, which the body converts into vitamin A. Beta-carotene is an antioxidant that has numerous health benefits. Besides its antioxidant properties protecting the cell from damage, people who have consumed high levels of beta carotene have been shown to have a reduced risk of developing cancer, heart disease and various diseases⁴.

The purple variation of the sweet potato also contains anthocyanin, which is responsible for the root's brilliant purple colour. Anthocyanins have been demonstrated to improve eyesight, reduce blood pressure, contain strong anti-inflammatory properties and suppress the spread of human cancer cells⁵. Thus, purple sweet potato is a highly beneficial crop.

Sweet potatoes also offer the lowest glycemic index ("GI") rating. Low glycemic index of sweet potato makes it an ideal alternative food for China's large population of diabetics. The Center for Science in the Public Interest ("CSPI") in the United States highly recommended sweet potato as one of the most nutritious food. It was found that sweet potatoes are rich in dietary fibre, sugars, vitamins, minerals and other essential nutrients, as compared to common vegetables.

Product research and development

The Group aims to constantly develop new sweet potato snack food products to suit the ever-changing tastes of modern consumers. Besides product development, the Group is dedicated to researching and implementing advanced technologies in our production processes and product design, including collaborations with research institutions.

Currently, we have partnered with Longyan Agricultural Science Research Institution and Jiangnan University to focus on new product development (such as frozen sweet potato product range) and the improvement of the texture of existing products.

As at FY2018, the Group has a total of nine registered patents, including seven technology patents and two invention patents.

Sustainable supply chain

More than 70% of our purchases are from reliable local suppliers in the PRC. We believe that a secure and stable supply chain is very important to ensure the smooth and uninterrupted operation of our production activities.

To further ensure that our supply chain is primed for long-term food security, community resilience, and environmental sustainability, we actively work with our partners to achieve the following:

70%

Purchases from local suppliers

Securing long-term supply

Since 2014, our subsidiary, Dizhongbao, has entered into long-term agreements with our suppliers as part of the Group's business strategy to secure our supply of quality sweet potatoes at a reasonable price.

Under the terms of the agreement, the suppliers will sell all the harvested sweet potatoes from their farmland exclusively to Dizhongbao at a preferential price.

Developing win-win partnership

At the start of each sweet potato season, our Research and Development Centre ("R&D Centre") takes charge to transfer sweet potato saplings from our greenhouse to our farmers. Experts from the R&D Centre also proactively teaches the farmers on proper care techniques to enhance the sweet potato harvest from each growth season.

Crop rotation

Sweet potatoes are prone to attacks by root rot nematodes. For this reason, our farmers are instructed to grow off-season crops such as rice as a crop rotation measure. This will replenish required nutrients into the soil to enable sustained harvests year after year.

3.3 Food safety

Overview

Food safety and quality are core to our commercial reputation and consumers' expectations. We are committed to responsible sourcing as it helps assure safety and quality of our end products.

We have always stressed the importance of food safety in our operations in each stage of our production process as evidenced by the ISO 9001:2008 and HACCP certifications over our production facilities.

Production quality and safety

Our quality control teams are committed to hygienic and safe production. The teams undergo regular food safety management training to maintain awareness and management of food safety risks, and are responsible for ensuring quality control of our products.

Our operations are audited regularly to monitor management and performance relating to hygiene, sanitation and 'good housekeeping'. We recorded no incidents of non-compliance with regulations and voluntary codes concerning the health and safety impacts of products. High standards of manufacturing help minimise exposure to risks that may affect product quality.

When we manufacture our snacks, we ensure high quality using stringent process controls to prevent contaminants entering the process.

We seek to continue our track record of zero food safety incidents, serious incidents and workplace injuries in the coming year.

Food packaging and labelling

Our food products are packaged using approved food-grade materials and our products passed the tests required by the Chinese national food safety standards. Packaging materials comply with the Chinese policy on producer responsibility.

Our marketing practices comply with Chinese regulations. Information on our food production permit number and the ingredients and nutritional values of each of our branded products is provided on the food label printed on the packaging. The labels also remind consumers to dispose the used packaging appropriately.

In addition, a dedicated customer support services hotline is available and prominently printed on our product labels for us to respond on specific matters. Customers are also encouraged to follow our official account on WeChat by scanning the QR code printed on our labels.

0

Incidents of non-compliance concerning marketing communications

3.4 Environmental sustainability

Overview

Environmental protection is fast gaining traction in China amongst policy makers and the public. This move caused a significant ripple effect across most industries, including the food manufacturing industry. As one of the leading players in the sweet potato snacks industry in China, we are committed to ensuring our full compliance with national environmental regulations.

Comprehensive policies are developed to ensure our commitment towards environmental protection, reducing carbon emissions, preventing pollution, and minimising waste can be achieved during our daily operations.

Environmental policy in China

Environmental policy in China is set by the National People's Congress and managed by the Ministry of Environmental Protection of the People's Republic of China. The central government issues strict regulations for which the actual monitoring and enforcement is largely undertaken by the local governments.

In January 2015, a new environmental law came into effect, covering land, water and air pollution. It contains strict penalties, including seizing of the property of illegal polluters, with company executives subject to prison sentences of 15 days. There is no upper limit on fines. More than 300 different groups will be able to sue on the behalf of people harmed by pollution.

As a direct result the new pollution requirements, we halted our production from January to September 2017 under the general directive of the local government due to the delay in completion of Liancheng county's centralised water treatment plant.

Since October 2017, the Group is able to partially resume production at the Zilaohu factory at a lower capacity following the interim measures in relation to waste water disposal and treatment arrangement put in place by local authorities. The Group has been informed that Liancheng county's centralised water treatment plant is only expected to commence operations in early 2019.

We look forward to the completion of the water treatment plant to ramp up production levels and seek to continue to comply with China's environmental policy in our operations.

Environmental incidents

¥0

Fines on contravention of environmental regulations

Emissions reduction

The corporate culture of protecting the environment is reflected in every operation undertaken by the Group.

We are committed to positive action on climate change and are dedicated to reducing the carbon emission in our daily operations. Employees are reminded to save electricity and fuel consumption through regular internal communications.

To determine the carbon footprint, we collect energy usage data from each of our businesses and then calculate our total annual greenhouse gas emissions.

In FY2018, the Group generated a carbon footprint of 2,342.66 tonnes of carbon dioxide emission (tCO₂e) with a carbon emission intensity of 10.5 tCO₂e per million yuan of revenue. The emission mainly arises from purchased electricity used in the production process, which accounted for more than 98% of the total carbon emission of the Group.

10.5tCO₂e

Carbon emission intensity per million yuan of revenue

We follow the Greenhouse Gas Protocol established by the World Resources Institute and the World Business Council for Sustainable Development, the standard manual for measuring corporate greenhouse gas emissions. Using the “control method”, we include 100% of the emissions associated with businesses which we directly control. Our carbon footprint includes:

- All fuels used directly by our companies (Scope 1 emissions)
- All purchased electricity used in our facilities (Scope 2 emissions)
- Impact of business air travel (optional Scope 3 emissions)

We will continue to monitor the performance on carbon emission reduction. Progress and performance on the reduction of carbon emission will be reported in the following year.

Energy efficiency

Buildings and factories are energy-intensive structures and electricity often constitutes a significant proportion of operating expenses. By investing in energy efficiency, we not only help protect the environment but can also lower our financial costs.

The Group's electricity consumption came from regular operations of the office and factory. In FY2018, the total electricity consumption intensity of the Group is 13.4 MWh per million yuan of revenue.

The Group utilised electricity-saving light bulbs at its office building as well as educated its employees about energy conservation and emission reductions. To ensure the effective use of electricity, the Group conducted the following practices:

- Turn off lights, computers and air conditioning system before clocking out
- Place energy saving reminder labels next to switches
- Clean office equipment (such as refrigerator, air-conditioner) regularly to maintain high efficiency
- Use energy saving equipment
- Set temperature of air conditioners to 25°C

The Group established policies and procedures to reduce energy consumption in the office and factory, to assess the energy efficiency, to increase the use of clean energy, if possible, to set applicable targets to monitor energy consumption, and to ensure power is turned off when electrical appliances are not in use.

Saving water

Water scarcity is a growing concern around the world and a serious global challenge that we must work together to address. This is even a greater concern to us, given that water is also an essential input in the food industry, from cleaning and sanitation to manufacturing.

In FY2018, the Group had a water consumption intensity of 769 m³ per million yuan of revenue. Where possible, the Group already has procedures in place to reduce water usage in our production lines. Our employees are also reminded of the importance to save water in their daily activities.

We will continue to monitor the performance on the water consumption reduction. Progress and performance on the reduction on water consumption will be reported in the following year.

Waste and wastewater management

Waste materials from our production activities are separated for proper handling and disposal through proper channels. The amount of waste materials disposed is currently not measured.

Wastewater treatment and disposal is handled entirely by Liancheng county's centralised water treatment plant on the Group's behalf. Greywater from the factory's operations are directly piped to the water treatment plant through the factory's sewage system.

As a result, the treated wastewater discharge will be able to meet the requirements of the water emission standard of the Fujian Province. We seek to continue to ensure that 100% of our wastewater discharge meet the local emission standards in the coming year.

13.4MWh

Electricity consumption intensity per million yuan of revenue

769m³

Water consumption intensity per million yuan of revenue

100%

Wastewater discharge that meets local emission standards

3.5 Social contribution

Overview

Employees are the integral part of our competitive advantage and our sustainability agenda. We strive to invest in training and create an enjoyable working environment to our employees. Our human resources team develops, evolves and champions our human 'capital' through training, evaluation, remuneration, and engagement.

Through our people, we are also committed in making positive contributions to our community by giving back to the society and helping the less privileged.

Employee redundancy

Due to the new pollution requirements, and coupled with the delay in completion of Liancheng county's centralised water treatment plant, we halted our production from January to September 2017 under the general directive of the local government.

As a result, during the same period, we had no choice but to terminate the employment of more than 400 staff in Zixin. We have compensated these employees accordingly based on the requirements of the Chinese Labour Law.

Upon recommencement of production in October 2017, priority was given to recruit these former employees should they choose to join us again. We wish to thank these employees for their loyalty to the Group.

Skills competency and employee training

To ensure that our employee excel, we emphasise on continuous learning in the workplace. Every employee has equal opportunities to upgrade and sharpen their skill sets through formal and on-the-job internal training programs.

The Company also emphasises on internal leadership development, and places great importance on developing a network of new-generation leaders who would play an important role in driving the business in the future.

In FY2018, the Group invested an average of 14 hours of training on each employee. We seek to continue this practice in the coming year.

14

Training hours per staff

Performance appraisal

To ensure the Company achieves its goals, we have various performance appraisal methods in place to determine the performance of the Company as well as each individual employee.

The employee performance appraisal comprises mainly quantifiable evaluation criteria. In addition, we actively collect performance information for each employee each month through inputs from direct supervisors and feedbacks, as well as periodical employee communication sessions.

These collected information allow us to understand the performance and skills development needs of each team and individual employee from multiple aspects. This is crucial for the Company to develop annual training programs for employees that are designed to enhance their skills and improve overall productivity.

In FY2018, all of our employees are at least subject to an annual performance appraisal by their superiors. We seek to continue this practice in the coming year.

Equal opportunity

We have always been an equal opportunity employer to provide a fair workplace for employees, following the principles of equality and non-discrimination. Recruitment, remuneration, promotion, and benefits are required to be handled based on objective assessment, equal opportunity and non-discrimination regardless of gender, race, marital status, pregnancy, disability, age or family status.

We attract talent through fair, and flexible recruitment strategy that includes recruitment application, job description, job applications, interview, selection, approval, and job offer. Promotion is based on performance and suitability.

We offer competitive remuneration to attract and retain talented staff members. Remuneration packages (which includes the necessary social benefits) are reviewed periodically to ensure consistency with employment market. Dismissal also complies with employment laws and regulations relating to non-discrimination.

In 2017, female employees comprise 66% of our entire workforce, with female representation in management at 14%.

Encouraging work-life balance

To enhance employee teamwork and cohesion, improve employee health and improve employee work-life balance, the Group has been organising periodic employee gatherings during major festivals and sports competitions. This helps the employees relax their mind and body, develop teamwork, explore their talent, so as to develop a positive attitude in both work and life.

Community initiatives

In FY2018, our Group made cash donations totaling ¥50,000 to two local schools to fund their Children's Day activities.

We also awarded ¥120,000 in bursaries to three promising local candidates to fund their university education. We strongly believe that education opens the door to a brighter future and we hope every student has the opportunity to achieve their fullest potential.

The Group will continue to invest in the above and other initiatives supporting educational causes.
